PROFILE

I am a punctual, organized & honest individual who is able to work in a busy environment and produce high standards of work. I am an excellent independent or team worker and am able to take instructions from all levels and build up good working relationships with all colleagues. I am flexible, reliable and possess excellent time keeping skills.

KEY SKILLS

- I have great knowledge with Server Management based on multiple Linux distributions. I am able to solve any issues that may come across and able to collect analytics from the servers.
- I have great knowledge on collecting analytics from websites and see what customers are looking for, see how people are finding your business and see where most of your customers are coming from. I can also work out if you have had more go on your site within the past Week/Month/Year either by estimate number of users or an estimate percentage.
- I have good knowledge making websites using HTML & CSS. I am able to make a your a good enough standard for SSO and still learning to this day on how to rise that standard. I have been using HTML & CSS for nearly 2 years now.
- I have 6 years experience in the Python programming language.

WORK EXPERIENCE

T4Tech   Jan 2018 — August 2018
Junior Technician

Computer Repairs and Laptop Repairs specialists based in Cwmbran, They have been serving the community and south Wales for over 8 years and have enjoyed every minute. With their highly qualified engineers, they always aim for great customer service and great quality work.

This was a placement I joined for completing an NVQ with Rathbone.

Team Knowhow   September 2018 — October 2018

INTERESTS & HOBBIES

I am interested in a few different things such as playing games, listening to music and talk to mates. I am interested on making these little ideas that i get in my head from time to time, a example of this is something that i call "Pink Portal", its essentially a cloud service that shows what that shows a open project called Nextcloud can do (Nextcloud is a self host cloud service).

At the moment, my taste in music is very random. It can be music that is normally heard on the radio these days but that is rare. Normally its music from 2010s and older but it can be some very random stuff, for example, for one minute i can be listening to Usher then all of a sudden to Yiruma.

I think one of the biggest things i do like doing is Traveling. I love to travel, i travel to a different part of the UK at least twice a month. This could be Birmingham, Manchester and sometimes Bristol but where ever it is, i love to travel. I normally travel by Train but sometimes i will use the Coach.

Another thing i like doing is helping people grow, grow like a business or something that they enjoy. Its nice seeing people grow something they want to show the world. It's something i will always try and get people to do cause it is something everybody should be doing in life.

As a hobby, i have this project called Melodyy. Melodyy is a music bot for the Discord platform owned by Discord app. Melodyy is written in Python using the discord.py api wrapper for Discord. It is a simple bot and only in about 130 servers. Melodyy can stream any video on YouTube to a Voice channel on Discord. So you could playing a game with mates and everyone including you could have a bit of music on while playing your game. There is a lot of music bots on Discord but this is my version on it.

OTHER INFORMATION

Date of Birth: 10/02/2001
Nationality: British
Relationship: Taken
Languages: English (UK)
